PHARMACY MANAGEMENT SYSTEM

• SCALABLE • ADAPTABLE • FLEXIBLE • SEAMLESS • SECURE

Spigot's Pharmacy software comes in three different variants. It is suitable for individual pharmacies, group of pharmacies in a central/sub store model, distributor model and pharmacies within a hospital setup. This software is highly scalable and works across all the activities in a pharmacy. The software works both in individual database mode as well as centralized database mode.

* Complete Inventory Workflow
* Sub/Central Stores Drug Requisitions & Central store indents
* Purchase Orders
* GRNs & Inspections
* Issues by Central Stores & Receipts by Sub Stores
* Purchase Rejections and Sales Returns
* Stock Adjustments
* Auto Synchronization of data between Central & Sub Stores
* Automatic Monitoring and alerts on expiring drugs
* Drug Dispensing & Billing
* Inter-Stores Transfer of Drugs
* MIS Reports like Stock On Hand, Stock Adjustment, Stock Value, Drug Expiry, etc.
* Easy Administration

For details on which feature is applicable to which variant please contact SPIGOT Sales Personnel
